

Econostitch® Peel Ply

Airtech's Econostitch® is an economical, heat set and scoured peel ply with good performance when used with both polyester and epoxy resins. It features red tracers for high visibility before and after cure, reducing the possibility of the peel ply being left of the part.

Econostitch® is designed to allow resin to bleed through the material producing a textured, bondable finished surface and can be used in resin infusion or hand lay-up processes. It can assist or eliminate the need for sanding or abrading on your composite laminate.

Physical Properties

Thickness	.006"
Material	Nylon
Color	White
Tracer	Red
Extractables	<0.5% by weight
Weight	2.6 oz/yd ²
Shelf Life	Indefinite
Manufacturer	Airtech International
Manufacturer Part Number	Econostitch®

Technical Properties

Maximum Temperature Use	375°F (190 °C)
-------------------------	----------------

Maximum use temperature is dependent upon the duration at maximum temperature and is process specific. Airtech recommends testing prior to use.
