

Vacuum Connector w/ Twist Pin

Airtech's Vac Valve 401C is a reusable, high temperature vacuum connector that allows a quick and reliable way to connect vacuum hoses to vacuum bags. With its featured 3 piece twist lock design, this vacuum connector is an economical option for high temperature bagging applications. When assembled, the base plate and silicone gasket are placed inside the vacuum bag. A small slit is cut in the bag to allow the stem of the connector to pass through. The locking top piece is placed over the stem, outside the bag, and twisted to provide a positive seal.

Physical Properties

Construction	2 piece: base plate, locking top piece
Material	Cast Aluminium
Base Plate Diameter	2.5", round
Gasket Material	Silicone
Screw Thread	1/4" male NPT
Assembly Style	Twisting Lock
Manufacturer	Airtech International
Manufacturer Part Number	Vac Valve 401C

Technical Properties

Max Temperature	500°F
